# **Overview of our wastewater network**

These are holes in the ground, covered by a lid, that provide entry to the wastewater network.

## **8,327km** of wastewater pipes

Wastewater drains into private wastewater pipes and connect to the public wastewater network which carry household wastewater to treatment plants.

### **18** wastewater treatment plants

At the treatment plants, wastewater is cleaned so that it is not harmful to people or the environment and can be released to sea, rivers or land. The public wastewater network is managed by us.

### Wastewater overflows occur when wastewater spills out from gully traps, manholes, engineered overflow points or pump stations.

## 528 pump stations

These are buildings with machinery for pumping wastewater from one place to another.
