

Beachlands-Maraetai

Prioritisation: low (1)

Population*

10,169

Growth forecast*

By 2048,
population
is expected
to grow to
10,200

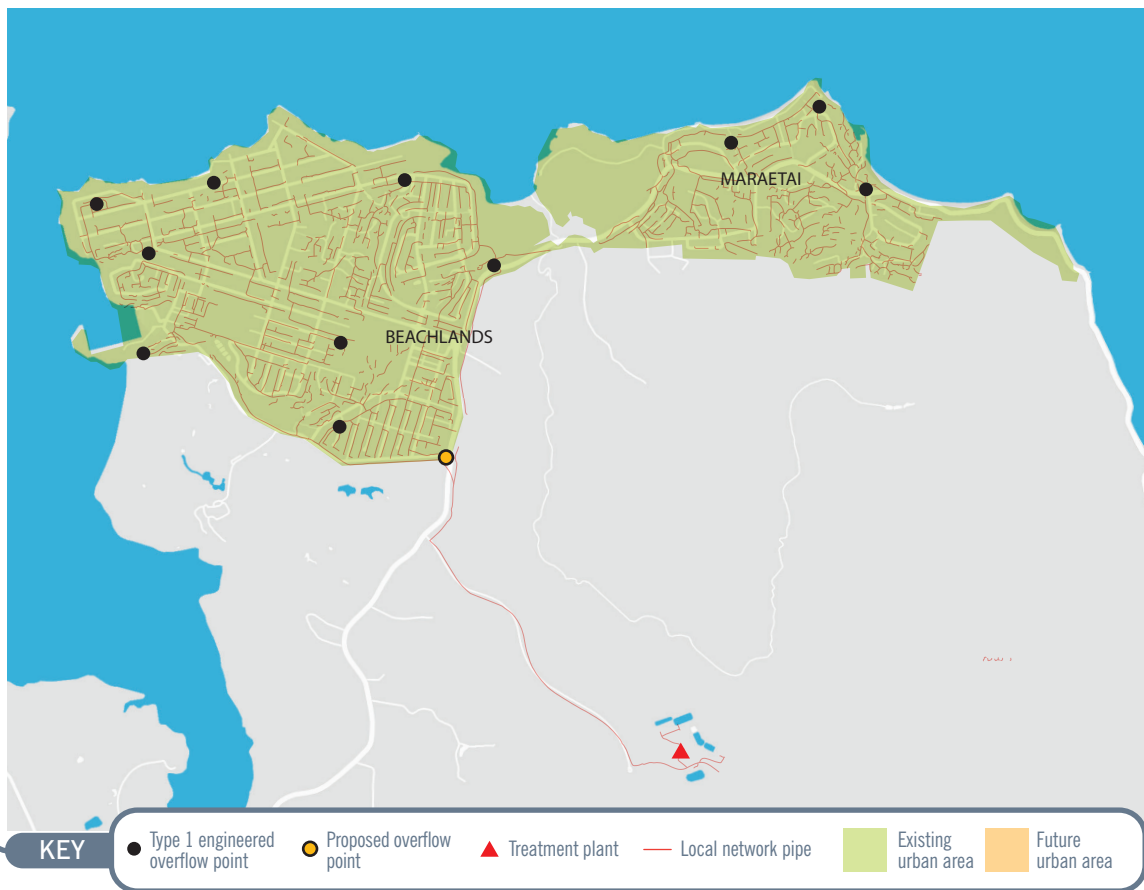

In this catchment, all receiving environments have been identified by local iwi as having very important cultural value.

A significant housing development has been proposed to provide for an integrated business centre with retail and commercial activities.

Currently, our wastewater network can support future growth in the Beachlands-Maraetai catchment.

There will be no major proposed work over the next six years.

We will continue to maintain the network through renewal programmes, repairing ageing infrastructure and carrying out investigation works such as Inflow and Infiltration.

* **Population:** is an estimate of the population of Watercare customers in the catchment area.

* **Growth forecast:** population data is provided by Auckland Council and based on the latest projected information, which means that the forecasted dates may vary.
