The potential for growth on Waiheke Island is limited both through community values and aspirations, as reflected in the Essentially Waiheke strategy, and through the requirement on most of the island for on-site wastewater disposal.

A total of 38 mostly commercial properties connected to the treatment works.

There will be no major proposed work over the next six years.

We will continue to maintain the network through renewal programmes, repairing ageing infrastructure and carrying out investigation works such as Inflow and Infiltration.

KEY

● Type 1 engineered overflow point

● Proposed overflow point

▲ Treatment plant

— Local network pipe
