

# Exchange Information Requirements (EIR)

Ver. 1

Date: 20 April 2020

<b>Revision</b>	<b>Description</b>	<b>Released By</b>	<b>Date</b>
0.1	First draft	J de Villiers	3/12/2019
1	First release	J de Villiers	20/4/2020

## Definitions

<b>Appointing party</b>	Watercare as the employer
<b>Asset information model</b>	The AIM is a single source of validated and approved information that relates to a built asset that comprise of models, data, documents and other records required for the operational phase of an asset
<b>BIM</b>	A process supported by various tools and technologies to generate, share and manage the digital representation of physical and functional characteristics of infrastructure

## Acronyms

AIM	Asset information model
AIR	Asset information requirements
BIM	Building information modelling
BEP	BIM execution plan
CDE	Common data environment
CAD	Computer aided design
EIR	exchange information requirement
IDP	Integrated design process
LOD	Level of development
LOI	Level of information
OIR	Organisational information requirements
PIM	Project information model
PMF	Watercare’s project management framework

## Exchange Information Requirement overview

The Exchange Information Requirement (EIR) specifies the base requirements of Watercare for Building Information Modelling in line with ISO19650 and Watercare's associated standards.

Watercare's associated standards are:

- Data and asset information standard, doc no. AI (Watercare's AIR and OIR)
- CAD manual, doc.no. 7363

This document has a number of sections that must be tailored by the Appointing Party (Watercare representative, BIM advisor, Consultant lead) to the specific project by completing the templates within to identify any project specific requirements. These include, but are not limited to:

- General project information
- Project schedule
- Key contacts
- Responsibility matrix

## EIR authority

This document shall be submitted as completed during tender as part of the employer's requirements or project information pack and is required to be agreed and accepted as the employer's Exchange Information Requirements (EIR) in the terms of engagement to the contract.

The relevant supply chain as part of the project shall also have read and understood the requirements of the EIR.

This document provides the structure for the development of the following documents by the appointed parties:

- BIM execution plan (BEP)
- Master information delivery plan
- Task information plan associated with specific information activities

## Table of contents

<b>1. GENERAL PROJECT INFORMATION .....</b>	<b>6</b>
<b>2. BIM PROCUREMENT AND EMPLOYING PARTY ENGAGEMENT .....</b>	<b>7</b>
<b>2.1 BIM VISION AND GOALS .....</b>	<b>7</b>
<b>2.2 BIM COMPETENCY REQUIREMENTS .....</b>	<b>8</b>
<b>2.3 APPLICABLE STANDARDS .....</b>	<b>9</b>
<b>2.4 DOCUMENT DELIVERY IN RESPONSE TO EIR .....</b>	<b>10</b>
<b>3. PROJECT SCHEDULE .....</b>	<b>10</b>
<b>4. KEY PROJECT CONTACTS.....</b>	<b>11</b>
<b>5. RESPONSIBILITY MATRIX .....</b>	<b>12</b>
<b>6. INFORMATION MANAGEMENT .....</b>	<b>14</b>
<b>6.1 COMMON DATA ENVIRONMENT (CDE) .....</b>	<b>14</b>
<b>6.2 DATA EXCHANGE .....</b>	<b>14</b>
<b>6.3 LEVELS OF INFORMATION NEED .....</b>	<b>15</b>
6.3.1 Model element authoring (Levels of development).....	15
6.3.2 Level of information .....	19

## 1. General project information

<b>Project name</b>	
<b>Project number</b>	
<b>Project address</b>	
<b>Type of asset</b>	
<b>Project description</b>	
<b>Phasing</b>	
<b>Form of contract</b>	
<b>Project number</b>	
<b>Design start</b>	
<b>Site construction start</b>	
<b>Site completion/handover</b>	
<b>Project brief</b>	
<b>Project execution plan</b>	

## 2. BIM procurement and employing party engagement

### 2.1 BIM vision and goals

To provide structured information and a defined process for collaborating in the delivery of BIM to Watercare that can be relied on for life of the asset.

Priority	Goal/vision description	How	BIM uses
High	Optimising the design	Visualisation of the design and 3D rehearsals. Clash detection. Sustainability and carbon footprint reduction	<ul style="list-style-type: none"> <li>Phase planning</li> <li>Design authoring</li> <li>Design review</li> </ul>
High	Stakeholder engagement	Virtual walk-throughs as a communications aid	<ul style="list-style-type: none"> <li>3D coordination</li> <li>Design review</li> </ul>
High	Support safety in design	3D visual aid, HAZOP reviews	Design review
Medium	Optimise commissioning	Digital rehearsal of commissioning, scheduling. Performance verification and recording	<ul style="list-style-type: none"> <li>3D coordination</li> <li>Record modelling</li> </ul>
Medium	Optimise handover	Digital as-built model with site verified information.	Record modelling
High	Respect overall budget to deliver the infrastructure	Reduced errors and rework. Improved construction coordination and construction rehearsal	<ul style="list-style-type: none"> <li>Cost estimation</li> <li>Progress payment and variation management</li> <li>3D coordination</li> </ul>

Priority	Goal/vision description	How	BIM uses
			<ul style="list-style-type: none"> <li>• Risk management</li> </ul>
<b>Medium</b>	Operational excellence	Operator training, maintenance planning and rehearsals. Replacement and upgrade simulation and management. Digital twin and asset performance optimisation	<ul style="list-style-type: none"> <li>• Record modelling</li> <li>• 3D coordination</li> </ul>

## 2.2 BIM competency requirements

The purpose of this table is to identify the value, experience and competencies required of the parties responsible for delivering the BIM enablement.

BIM use	Value to Watercare	Responsible parties	Value to parties	Competencies required to implement
<b>Design authoring</b>	Medium			<ul style="list-style-type: none"> <li>• Proficient in creating and managing a AIM</li> <li>• Design and construction experience using BIM</li> </ul>
<b>Design review</b>	High			<ul style="list-style-type: none"> <li>• Manipulate, navigate and review in 3D model space</li> <li>• Strong understanding of Watercare facilities and system processes</li> <li>• Communication with stakeholders</li> </ul>
<b>3D Coordination</b>	High			<ul style="list-style-type: none"> <li>• Manipulate, navigate and review in 3D model space</li> <li>• Clash detection</li> <li>• Digital rehearsal of construction activities / sequences</li> </ul>
<b>Cost estimation</b>	High			<ul style="list-style-type: none"> <li>• Output quantities form the model for accurate cost estimation</li> <li>• Adjust cost plan as design evolves</li> </ul>

BIM use	Value to Watercare	Responsible parties	Value to parties	Competencies required to implement
<b>Record modelling</b>	High			<ul style="list-style-type: none"> <li>• 3D model manipulation</li> <li>• Updating design and construction records</li> </ul>
<b>Digital rehearsal</b>	Medium			<ul style="list-style-type: none"> <li>• Knowledge of, and using in 4D software:</li> <li>• Construction planning</li> <li>• Health and safety in construction and operation planning</li> <li>• Maintenance planning</li> </ul>
<b>Progress claim handling</b>	Medium			3D model updates in construction and overlaying model in construction to accurately reflect progress for claim management
<b>Other:</b>				

### 2.3 Applicable standards

Standard	Applicable
ISO 19650	Yes
BS1192-4 – COBie	Yes
ISO 55000	
<b>Other:</b>	

## 2.4 Document delivery in response to EIR

Document deliverable as part of response to the EIR:

- BIM execution plan (BEP)
- Master information delivery plan
- Task information plan associated with specific information activities

## 3. Project schedule

Record proposed major milestones during the project life cycle:

Project phase	Est. start date	Est. completion date	BIM meetings
Project establishment			
Concept design			
Development design			
Detailed design			
Procurement			
Construction			
Handover			
Operation			

4. Key project contacts

Role	Discipline	Company name	Contact name	Contact e-mail
<b>Watercare representative</b>				
<b>Project manager</b>				
<b>BIM Lead</b>				
<b>Lead consultant</b>				
<b>Other:</b>				

## 5. Responsibility matrix

Role	Responsibilities
<b>Watercare representative (PIM receiver)</b>	Define the EIR, OIR and AIR and structured data requirements
	Define the IDP – Watercare’s design delivery process is defined in the PMF
	Establish the CDE
	Authorise information sharing and publishing
	Accept or reject information exchanges to the CDE
	Validate the AIM
<b>Project manager</b>	Assure delivery of information exchanges
	Confirm suppliers’ ability to deliver the information requirements
	Accept or reject information exchanges within the CDE
<b>BIM Lead</b>	Facilitate use of the BEP
	Ensure model files are developed in accordance with the BEP
	Validate LOD and LOI
	Perform model audits and communicate issues the model element authors
	Manage the BIM execution planning and coordinate model review meetings
<b>Lead designer</b>	Co-ordinate delivery of all design information

	Manage information development and information approvals with Watercare
	Confirm design deliverables
	Confirms status of information within the CDE
<b>Other:</b>	

## 6. Information management

### 6.1 Common data environment (CDE)

CDE platform	Responsible party	Project phase
Bentley ProjectWise	Watercare	Project establishment

### 6.2 Data exchange

The supplier must confirm their ability to use the below platforms in the BEP and identify any additional resources to meet these outputs.

BIM use	Approximate due stage	Format	Comments
Cost estimation		IFC	
Design authoring		IFC	
3D co-ordination		IFC	
2D graphical		PDF and DWG	
Documentation		PDF, DOC	
Non-graphical asset data		COBie	The supplier must align their model to be consistent with BS1192-4
<b>Other:</b>			

## 6.3 Levels of information need

### 6.3.1 Model element authoring (Levels of development)

<b>LOD 100</b>	Conceptual
<b>LOD 200</b>	Approximate geometry
<b>LOD 300</b>	Design specific / precise geometry
<b>LOD 350</b>	Precise geometry and interfaces
<b>LOD 400</b>	Fabrication and assembly
<b>LOD 500</b>	Field verified

Phase	Concept	Preliminary design	Developed design	Detailed design	Construction	Operation	Notes/comments
Model Element							
<b><i>Spatial / Site</i></b>							
Boundaries	100	500	500				
Topography, grids and levels	100	500	500				
Landscaping	100	200	200	200			
Roads	100	300	300	300	500		

Phase	Concept	Preliminary design	Developed design	Detailed design	Construction	Operation	Notes/comments
Model Element							
Parking	100	300	300	300	500		
Paths	100	300	300	300	500		
Fences	100	200	300	300	500		
<b>Civil structure</b>							
Excavation	200	200	200	200	500		
Foundations	200	200	300	350	500		
Retaining walls	200	200	300	300			
Walls		200	300	300			
Subsoil drainage		200	300	300			
Floors	200	200	300	350			
Columns	200	200	300	350			
Beams	200	200	300	350			
Framing	200	200	300	300			
Penetrations		200	300	300			

Phase	Concept	Preliminary design	Developed design	Detailed design	Construction	Operation	Notes/comments
Model Element							
Stairs, ladders and ramps	200	200	300	400	500		
Platforms and landings	200	200	300	400	500		
Roof	200	200	300	350			
Seismic bracing		200	300	400	500		
Chambers and manholes	200	200	300	400	500		
Maintenance and access zones	200	200	300	300			
<b>Building services</b>							
Plumbing systems	200	200	200	300		200	
Electrical systems	200	200	200	300		200	
Security system	200	200	200	300		200	
Firefighting system	200	200	200	300		200	
Lifts and escalators	200	200	200	300		200	
<b>Mechanical plant and field</b>							

Phase	Concept	Preliminary design	Developed design	Detailed design	Construction	Operation	Notes/comments
Model Element							
Valves and actuators	200	200	300	350		300	
Pumps	200	200	300	350		300	
Pipework and ducting	200	200	300	350	500	300	
Pipe fittings	200	200	300	350		300	
Fixings and brackets	200	200	300	350	500	300	
Cranes and hoists	200	200	300	350		300	
Machinery	200	200	300	350		300	
Safety equipment	200	200	300	350	500	300	
HVAC	200	200	300	350		300	
<b>Electrical plant and field</b>							
In-cabinet control and electrical equipment	200	200	200	200		200	
Electrical and control circuitry/cables outside cabinets	200	200	300	350	500	300	
Electrical and control cabinets (exterior)	200	200	300	300		200	

Phase	Concept	Preliminary design	Developed design	Detailed design	Construction	Operation	Notes/comments
Model Element							
Field emergency buttons	200	200	200	300	500	300	
Motors	200	200	200	300		300	
Lighting	200	200	300	300		300	
Cable trays	200	200	300	300	500	300	
<b><i>Instrumentation plant and field</i></b>							
All instruments	100	200	300	300		300	

### 6.3.2 Level of information

The level of information shall be supplied as specified in the following Watercare documents:

Document name	No.
Data and asset information standard	AI
CAD manual	7363
