

CENTRAL INTERCEPTOR BULLETIN

Walmsley Park site

727-761 Sandringham Rd Extension, Mt Roskill

We're building the Central Interceptor, a super-sized wastewater tunnel to reduce overflows, creating a better environment for you to enjoy.

About the Walmsley Park construction site

We are back on track to set-up the Walmsley Park site which was delayed due to COVID19. The Walmsley Park site is on the main Central Interceptor tunnel alignment between Grey Lynn and the Mangere site. It is the seventh site to begin construction and includes a main shaft and connections to nearby wastewater networks which will help divert wastewater overflows.

The site is located at Walmsley Park in Mount Roskill with site access off Sandringham Road Extension.

What you will notice

We will begin setting up site late October 2020. This includes constructing a vehicle crossing, installing temporary fencing along the site boundary, removing vegetation, installing temporary site office and constructing the piling platform. The main construction will include drilling a shaft and preparing for the main tunnel which will pass below ground at a depth of approximately 65 metres.

The shared pathway to the south of the park will be closed during construction. Access to the park from Sandringham Rd will only be from the path to the north of the site.

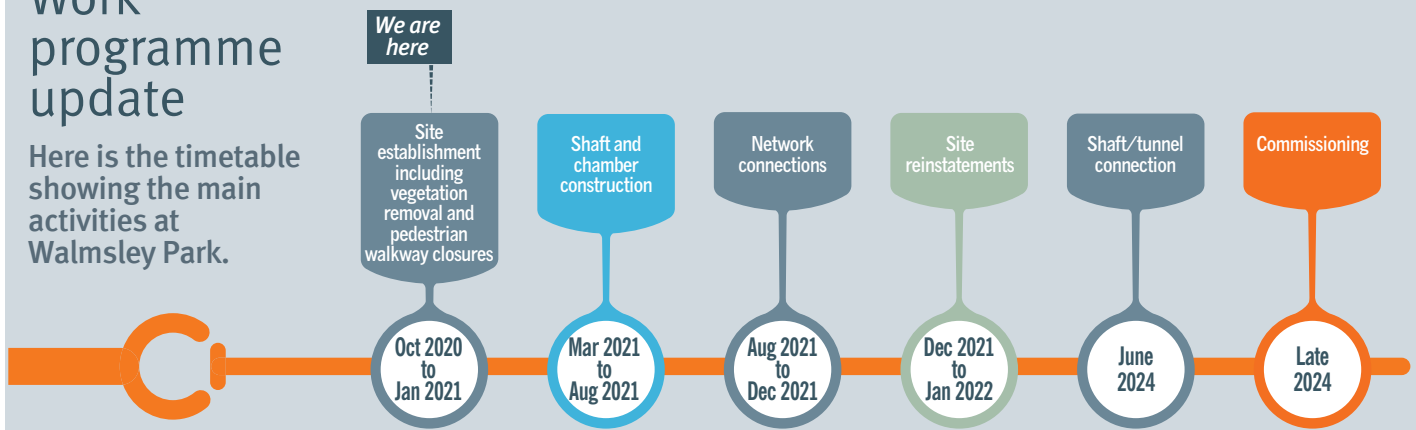

The pedestrian crossing next to Walmsley park will be relocated to make it safer for road users. A new temporary pedestrian crossing will be installed north of the work site.

Initially a stop and go system will be in place while we relocate the pedestrian crossing and install the site vehicle access. Please follow all traffic signs and traffic management instructions to cross the road safely while we work. The bus stop outside the community centre will also be temporarily relocated approximately 60 metres south towards O'Donnell Avenue.

Work programme update

Here is the timetable showing the main activities at Walmsley Park.

Timing of work

The construction works are due to start late October 2020 and will take approximately 14 months to complete. When these works are complete, the site will be temporarily reinstated until we return to site in mid-2024 to connect the shaft to the new Central Interceptor tunnel.

How will construction affect you?

- General work hours will be between 7am to 6pm, Monday to Friday and 8am to 6pm on Saturdays. There may be times where unexpected ground conditions or certain activities may require us to work past the general work hours. This will comply with Auckland Council's permit rules.
- Traffic management will be in place for the safety of motorists, pedestrians, cyclists and workers.
- Truck movements will be limited Monday to Friday during school terms between 8:15am and 9:15am and 2:45pm and 3:15pm.
- Construction projects such as these often generate noise and vibration, which you may experience if you are at home during work hours. We undertake careful planning and monitoring in accordance with Council requirements. We use noise barriers and fencing to minimise general construction noise whenever possible.

We encourage you to receive these updates electronically - send us your email, your current mailing address and quote "Go sustainable: Walmsley Park site bulletin" to ciproject@water.co.nz

Meet the Contractor

We will organise a meet the contractor event after we set up site. Keep an eye on your letterbox for an invitation in the near future. This community event is an opportunity to come and find out more about the project, how we will work with you while we are in the neighbourhood and discuss the Walmsley Park construction activities.
