## **Metropolitan Water Treatment Plants - Treated Water Fluoride Concentration**

## Note

Fluoride is added to Auckland's metropolitan water supply at the request of Auckland's legacy Councils. The Ministry of Health recommends that the fluoride content in New Zealand drinking water should be maintained in the range of 0.7 to 1.0mg/L for oral health reasons. Testing is carried out by an accredited laboratory using the Ion Selective Electrode method as per New Zealand's Drinking Water Standards.

(\*) Represents the combined fluoride levels across both the Waikato and Waikato 50 sites
